EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
M.Tech. (AI)	Indian Institute of Technology, Patna	0 (First Sem)	2025-Present
B.Tech. (ECE)	COEP Technological University, Pune	8.12 CGPA	2019-2023
12th Standard	HSC Maharashtra State Board	81.23%	2019
10th Standard	SSC Maharashtra State Board	98.4%	2017

EXPERIENCE

- Societe Generale** June 2023 - July 2025
Software Engineer Bengaluru
 - Worked with a team to maintain and enhance a full stack web application using Java, Spring Boot, Microservices, AngularJS frameworks, and Oracle, and PostgreSQL databases.
 - Learned the production level customs, agile methodology and the coding practices in the industry.
 - Handled production releases and resolved critical production issues to ensure system stability and availability.
 - Applied various DSA concepts for improving the application and developed some Machine Learning models to automate certain processes.
 - Participated in several global hackathons and some sports events.

PUBLICATIONS

- ICCCNT 23** - 14th International Conference on Computing, Communication and Networking Technologies
 - Co-authored and published a paper titled “Two-way Communication: An Integrated System for American Sign Language Recognition and Speech-to-Text Translation” in IEEE Xplore, presented at ICCCNT 2023 (Paper link)

PROJECTS

- American sign language detection using opencv**
BTech Final year project in Deep learning
 - * Developed a real-time American Sign Language recognition application using OpenCV and CNNs, enabling communication between signers and non-signers.
 - * Created a custom dataset and introduced a novel preprocessing technique with domain-specific vocabulary, contributing unique advancements to sign language recognition research. (Github code link)
- Analysis of Winogradsky columns using Image detection**
Data Science in Microbiology (ongoing)
 - * Developing a software solution with a microbiologist collaborator to quantitatively characterize Winogradsky columns, traditionally a qualitative tool for studying soil ecology.
 - * Implementing image processing techniques (e.g., contour detection, segmentation) to detect and quantify microbial colonies, enabling reproducible and standardized analysis.
 - * Bridging ecological domain knowledge with computational methods to derive data-driven insights into microbial growth patterns.
- Analyzing UI trends in Indian society**
Industrial Psychology project using Data analytics
 - * Conducted a survey on user interface (UI) trends within Indian society; analyzed and processed the collected data to derive insights and formulate conclusions.

KEY COURSES TAKEN

- Probability and Statistics, Linear Algebra, Data Structures and Algorithms, Machine Learning, Deep Learning, Data Science, Advanced Pattern Recognition, Natural Language Processing, Reinforcement Learning

TECHNICAL SKILLS

- **Programming languages:** Python, C, SQL, Java, JS, HTML
- **Tools & OS:** Git, Jupyter Notebook, Google Colab, IntelliJ, Linux, Windows
- **Libraries/Frameworks:** Tensorflow, Pytorch, Keras, OpenCV, Pandas, Numpy, scikit-learn, Angular, Springboot, RESTful APIs, Kubernetes

POSITIONS OF RESPONSIBILITY

Decor head, Art director, Events coordinator: Impressions, cultural fest of COEP Aug. 2019 - Dec. 2022
